### Filing Description:

Full filing of advisory loss costs, advisory rates and rating values for both voluntary and assigned risk business effective January 1, 2015 for new and renewal policies. This filing proposes a 3.7% decrease to the overall rate level.

Note: To expedite the filing review process, the ICRB is today filing information on the overall change in experience, trend, benefits, and expenses. In several weeks the ICRB will file an additional document attachment containing the classification code rate pages. These pages will consist of two exhibits:

- Exhibit IV - Advisory Loss Costs and Advisory Rates
- Exhibit V - Assigned Risk Rates and Rating Values

**Advisory Loss Costs and Rates Filing  
Proposed Effective January 1, 2015**

September 18, 2014

Steve Robertson  
Commissioner of Insurance  
Indiana Department of Insurance  
311 W. Washington St., Suite 300  
Indianapolis, IN 46204-2787

**RE: Workers Compensation Advisory Loss Costs, Rates, and Rating Values:  
Indiana Voluntary and Assigned Risk Markets**

Dear Commissioner Robertson:

In accordance with the applicable statutes and regulations in the state of Indiana, I am filing for your consideration and approval the workers compensation advisory loss costs, advisory rates, and rating values for the Indiana voluntary market and assigned risk rates and rating values for the Indiana assigned risk market. This filing proposes a 3.8% decrease to the overall voluntary loss cost level and a 3.7% decrease to the overall voluntary and assigned risk rate level to become effective on January 1, 2015 for new and renewal business.

Please note the following in connection with this filing:

1. As a result of Item B-1397, effective July 1, 2007, the experience for Class Codes 7704, 7710, and 7711 is combined to determine a single loss cost for Class Codes 7710 and 7711.
2. As a result of Item E-1402, the split point for experience rating was changed from \$13,500 to \$15,500. This is the third and final year of the split point transition period. In each subsequent filing, the split point will be indexed by the countrywide severity change.
3. As a result of Items R-1408 and R-1409, the retrospective rating plan parameters were updated.
4. As a result of Item B-1426, the Per Passenger Seat Surcharge for Class Code 7421 is discontinued effective January 1, 2015.
5. As a result of Item B-1427, Class Code 3069 is discontinued effective January 1, 2015, and Class Code 3076 reflects the combined experience of Class Codes 3069 and 3076.

Our desire is to make this filing as clear as possible. For additional information, a technical supplement is available. If you would find it helpful, we would be glad to meet with you at your convenience.

We make this filing on behalf of the members and subscribers of the Indiana Compensation Rating Bureau. All persons on the "Interested Persons List" have been notified of the captioned filing.

respectfully request that the filing be "Filed" electronically via the NAIC SERFF system within thirty days.

Sincerely,

Actuarial content prepared by:

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Background and Filing Procedure

The workers compensation benefit system is designed to cover medical costs associated with workplace injuries, as well as provide wage replacement (indemnity) benefits to injured workers for lost work time.

As the data collection service provider to the Indiana Compensation Rating Bureau (ICRB), the National Council on Compensation Insurance, Inc. (NCCI) collects an extensive amount of information regarding the workers compensation system in Indiana. The ICRB submits proposed advisory rates for review and approval by the Indiana Commissioner of Insurance. These advisory prospective rates are intended to cover the indemnity and medical benefits provided under the system, the expenses associated with providing these benefits (loss based expenses), and any other costs associated with providing workers compensation insurance (such as commissions, taxes, etc.).

The filing also contains advisory loss costs. The prospective loss costs are intended to cover the indemnity and medical benefits provided under the system, as well as some of the expenses associated with providing these benefits (loss adjustment expenses). They do not, however, contemplate any other costs associated with providing workers compensation insurance (such as commissions, taxes, etc.).

Carriers offering workers compensation insurance in Indiana may desire to a) adopt the advisory rates which are based on NCCI's compilations of expense data, b) deviate from the advisory rates, or c) adopt the advisory loss costs to which they would apply their own expense provisions. The latter option can be accomplished through a loss cost multiplier that is applied to the approved advisory prospective loss costs in order to compute the final workers compensation rates that a carrier intends to charge. This multiplier is intended to cover the other costs associated with providing workers compensation insurance that are not already part of the advisory prospective loss costs.

In this filing, the ICRB is proposing that the Commissioner approve a 3.8% decrease in the current voluntary loss costs and a 3.7% decrease in the current voluntary advisory rates and assigned risk rates (which went into effect on January 1, 2014), and that the new rates become effective on January 1, 2015. This document will explain why these changes are necessary.

NCCI separately determines the advisory rates and loss costs for each workers compensation classification. The actual change from the current rate and loss cost is different depending on the classification. The rates and loss costs for some classifications would increase and some would decrease if this filing were

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

approved.

Employers unable to secure coverage in the voluntary market can apply for such coverage in the assigned risk market. The proposed rates for the voluntary market are also applicable to the assigned risk policies, with a proposed effective date of January 1, 2015. Currently, assigned risk policies with premium greater than \$2,500 are assessed a 25% surcharge, with the surcharge being applied to the premium amount above \$2,500. This filing proposes no change to the assigned risk surcharge.

INDIANA

WORKERS COMPENSATION FILING – JANUARY 1, 2015

Summary of Proposed Changes

<u>Key Components</u>	<u>Percentage Change</u>
Change in Experience, Trend and Benefits	-3.3%
Offset for Change in Minimum Premium	-0.2%
Change in Loss-based Expenses	-0.3%
<b>Overall Voluntary Loss Cost Change</b>	<b>-3.8%</b>
Change in Production and General Expenses	+0.1%
Change in Taxes	0.0%
<b>Overall Voluntary Rate Level Change</b>	<b>-3.7%</b>
<b>Overall Assigned Risk Rate Level Change</b>	<b>-3.7%</b>

The change in rates varies depending on the classification. Each classification belongs to one of five industry groups. The average change in rates proposed for each these five groups is displayed below, as well as the largest increase and largest decrease possible for a classification in each of those groups.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Key Components

There are four key components in this filing: experience, trend, benefits, and expenses. They will each be separately discussed.

#### Experience

NCCI analyzed the emerging experience of Indiana workers compensation policies in recent years. The primary focus of our analysis was on premiums and losses from policy years 2011 and 2012, evaluated as of December 31, 2013 (a policy year captures the premiums and losses from the block of policies that had effective dates during a given year). The most recently available full policy year is 2012 since the last policy had an effective date of December 31, 2012 and did not expire until December 31, 2013. During this year's analysis, after reviewing various possible experience periods, the use of the two most recently available full policy years of data was selected as most appropriate in terms of providing balance between stability and responsiveness.

It should be noted that NCCI adjusts (via premium and loss on-level factors) the historical policy year experience to reflect rate level changes as well as statutory benefit level changes implemented since that time period.

Different aggregations of limited loss experience were analyzed in preparation of this filing. These were (i) paid losses (benefit amounts already paid by insurers on reported claims) and (ii) the sum of paid losses plus case reserves (paid losses and the amounts set aside to cover future payments on those claims). For use in this filing, NCCI utilized loss development factors based on each of these two loss aggregations. This is consistent with NCCI filings made in the past several years in Indiana. Loss development factors are needed since paid losses and case reserve estimates on a given claim change over time until the claim is finally closed. The loss development factors are based on how paid losses and case reserve estimates changed over time for claims from older years.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Key Components (Continued)

##### Trend

As noted previously, the filing relies primarily on the experience from policy years 2011 and 2012. However, the proposed rates and loss costs are intended for use with policies with effective dates starting on January 1, 2015. It is necessary to use trend factors that forecast how much the future Indiana workers compensation experience will differ from the past. These trend factors measure anticipated changes in the amount of indemnity and medical benefits as compared with anticipated changes in the amount of workers' wages. For example, if benefit costs are expected to grow faster than wages, then a trend factor greater than zero is indicated. Conversely, if wages are expected to grow faster than benefit costs, then a trend factor less than zero is indicated.

In order to appreciate the impact of the various filing components on overall system costs, it is helpful to consider the separate indemnity and medical segments of Indiana benefit costs.

#### Distribution of Indiana Benefit Costs

As can be seen, three quarters of Indiana's total benefit costs are medical. This percentage is higher than in most other states.

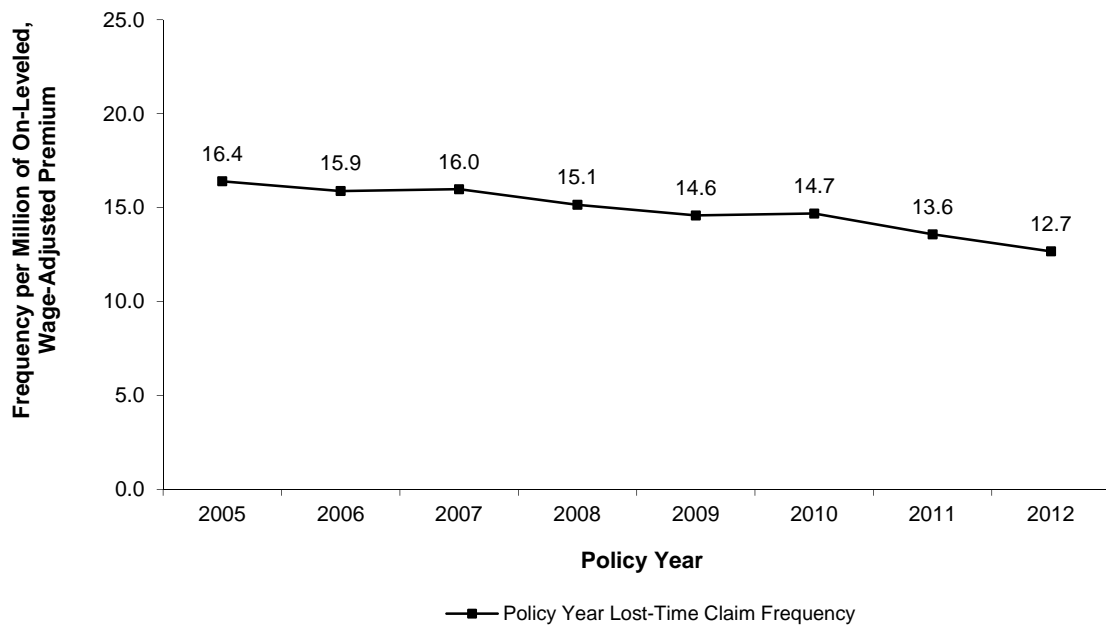

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

Let us begin by analyzing a measure of the number of workplace injuries (claim frequency) and the average cost of each of these injuries (claim severity). The chart below summarizes the recent history of Indiana lost-time claims (i.e., those claims where a worker has received wage replacement benefits due to a compensable workplace injury). The data in the chart reflect premiums at today's rate and wage levels.

#### Indiana Claim Frequency

As this chart illustrates, Indiana's claim frequency has generally declined over the past eight years.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

Let us look at the indemnity side of benefits. The chart below shows Indiana's historical average indemnity cost per case figures for the most recent eight years. The data in the below chart reflect losses at today's statutory benefit levels.

#### Indiana Indemnity Cost Per Case

After removing the impact of the growth in workers' wages that occurred over this time period, the average indemnity cost per case in excess of wage growth is shown in the following chart.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Indiana Indemnity Cost Per Case Adjusted to Current Wage Level

As this chart illustrates, the average indemnity cost per case in excess of wage growth has remained fairly consistent over time.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

The indemnity loss ratios below result after combining the observed changes in Indiana's average claim frequency with the corresponding changes in Indiana's average indemnity cost per case. An indemnity loss ratio represents the proportion of premium dollars that are necessary to cover indemnity (wage replacement) benefits on behalf of injured workers. The data in the chart reflect premiums at today's rates and losses at today's statutory benefit levels.

#### Indiana Indemnity Loss Ratio History

Indemnity loss ratios have generally decreased since 2005. In last year's Indiana filing, NCCI proposed an indemnity trend factor of -2.5% per year. Based on our analysis this year, including the expected impact on indemnity benefits from House Enrolled Act (HEA) 1320 (see Benefits section), we are proposing to decrease the indemnity trend factor to -3.0% per year. This means that indemnity benefits are once again expected to increase at a slower pace than workers' wages.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

Indiana's average medical cost over time (claim severity) is tracked in the following chart. The data in the below chart reflect losses at today's statutory benefit levels.

#### Indiana Medical Cost Per Case

Before adjusting the average cost per case figures to a common wage level, this chart shows that Indiana's average medical severity figures have increased steadily since 2005.

After removing the impact of the growth in workers' wages that occurred over this time period, the average medical cost per case in excess of wage growth is shown in the following chart.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Indiana Medical Cost Per Case Adjusted to Current Wage Level

The average Indiana medical cost per case in excess of wage growth has increased consistently since 2005 as shown above. Considering the fact that approximately three quarters of the state's benefits are medical, claims cost changes in this area can notably impact the workers compensation system.

(Note: Unlike indemnity benefits, the level of workers compensation medical benefits is not directly based on average weekly wages. Even so, it is still instructive to review the changes in medical average cost per case in excess of wage growth—as this allows one to combine the change in the wage-adjusted medical average cost per case by the similarly-adjusted change in claim frequency in order to approximate the change over time in the overall medical loss ratios.)

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

The medical loss ratios below result after combining the observed changes in Indiana's average claim frequency with the corresponding changes in the average medical cost per case. A medical loss ratio represents the proportion of premium dollars that are necessary to cover medical benefits on behalf of injured workers. The data in the chart reflect premiums at today's rates and losses at today's statutory benefit levels.

#### Indiana Medical Loss Ratio History

Medical loss ratios increased steadily from 2006 to 2010 before decreasing in the latest two years. In last year's Indiana filing, NCCI proposed a medical trend factor of +2.0% per year. Based on our analysis this year, including the expected impact on medical benefits from House Enrolled Act (HEA) 1320 (see Benefits section), we are proposing to decrease the medical trend factor to +1.5% per year. This means that the rate of growth in medical benefits is once again expected to increase at a faster pace than workers' wages.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Key Components (Continued)

##### Benefits

Workers injured in Indiana receive wage replacement (indemnity) benefits at a rate of two-thirds of their pre-injury weekly wage. These benefits are subject to a weekly minimum and maximum. In Indiana, legislation must be enacted to change benefit levels.

Indiana House Enrolled Act (HEA) 1320 was enacted on April 26, 2013. HEA 1320 included provisions that became effective in 2013 and 2014, with others to become effective in 2015 and 2016. A brief summary of the pertinent provisions of HEA 1320 that impact this filing are described below.

Effective 7/1/2014, reimbursement for facilities (i.e. hospital outpatient, hospital inpatient) can be based on any one of the following:

- Negotiations between the medical facility and employer, insurer, billing review service and provider network
- An amount not more than 200% of Medicare

In 2013, NCCI performed an analysis of Indiana's Medical Fee Schedule implementation. That analysis assumed services performed by ambulatory surgical centers (ASC) were subject to the fee schedule. However, in a recent ruling by the Worker's Compensation Board of Indiana, ambulatory surgical centers are not considered medical service facilities under Indiana Code 22-3-6-1(j), and are therefore not included under the new medical fee schedule.

Also, the 2013 analysis by NCCI was based on the calendar year 2013 version of Medicare's inpatient and outpatient fee schedules and Medical Data Call information for Service Year 2011, which were the latest available at that time. Given the recent ruling from the Worker's Compensation Board and the July 1, 2014 effective date for the fee schedule implementation, NCCI is now updating the 2013 analysis by removing ASC services, and using Medicare's 2014 fee schedules and Medical Data Call information for Service Year 2012.

NCCI now estimates that the implementation of the Indiana Medical Fee Schedule for Facilities as described in Indiana House Enrolled Act 1320 (HEA1320), effective July 1, 2014, will result in a -6.8% impact on medical costs and -5.2% overall impact on Indiana workers compensation system costs. This revised impact is included in the medical on-level factors underlying this year's filing (see Appendix A-I in Technical Supplement).

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

HEA 1320 increases the amount payable in dollars per degree of impairment for permanent partial disability over a three-year period. The table below summarizes the changes to awards per degree of permanent partial (PP) impairment by effective date from the currently approved values:

<b>Award per degree of impairment</b>	<b>Current</b>	<b>7/1/2015</b>	<b>7/1/2016</b>
1-10 degrees	\$ 1,517	\$ 1,633	\$ 1,750
11-35 degrees	\$ 1,717	\$ 1,835	\$ 1,952
36-50 degrees	\$ 2,862	\$ 3,024	\$ 3,186
51-100 degrees	\$ 3,687	\$ 3,873	\$ 4,060

HEA 1320 increases the maximum weekly wage used in the determination of benefits from \$975 to \$1,170 and also increases the maximum aggregate benefit payable from \$325,000 to \$390,000, with all changes phased in annually over a three-year period. The table below summarizes the changes to the maximum weekly wage and maximum aggregate benefits by effective date from the currently approved values:

<b>Component</b>	<b>Current</b>	<b>7/1/2015</b>	<b>7/1/2016</b>
Maximum Weekly Wage	\$ 1,040	\$ 1,105	\$ 1,170
Maximum Aggregate Benefit	\$ 347,000	\$ 368,000	\$ 390,000

The direct impact of the changes to the permanent partial awards, and the maximum weekly wage and maximum aggregate benefit amounts effective July 1, 2015 is estimated to be +1.1% on overall Indiana system costs.

The prorated impact of the increase in impairment awards, maximum weekly wage and maximum aggregate benefit is estimated to be +0.9%.

The impacts from the July 1, 2016 indemnity benefit changes will be incorporated into future Indiana loss cost and rate filings.

For additional details, please refer to Appendix C-I and C-II of the Technical Supplement.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Key Components (Continued)

##### Loss-Based Expenses

The proposed loss costs and rates include a provision for loss adjustment expenses (LAE). LAE is included in the loss costs by using a ratio of loss adjustment expense dollars to loss dollars (called the LAE provision). After examining LAE indications based on both Indiana specific data and countrywide data, NCCI is proposing to decrease the currently approved LAE provision from 15.9% to 15.4% of losses.

In 2014, the Indiana Department of Labor (DOL) issued its notice for the INSafe tax assessment. The money in this fund is used solely for safety and health consultation, education, and training services for employer groups and for the on-site consultation service. This tax is imposed upon each insurance carrier licensed to do workers compensation business in the state, and on each self-insured employer. The DOL indicated that the special fund for safety and health consultation is less than \$600,000, thus triggering the statutory tax levy. The last assessment was levied in 2009. In this filing, we are proposing to include a provision of 0.2% of losses for the INSafe assessment.

After taking into account the changes in the LAE provision and the INSafe assessment, NCCI is proposing to decrease the total loss based expense provision from 15.9% to 15.6%.

##### Production and General Expense

The proposed rates include a provision for production and general expenses. The latest data from the Insurance Expense Exhibit (which is reported annually by insurers to state insurance departments) is used to derive the Indiana expense provision.

This filing proposes a change to the currently approved production expense provision of 17.6% to 17.8% of premium, and it proposes a change in the general expense provision from 5.0% to 4.9% of premium.

The overall rate change due to the proposed production and general expense provisions is an increase of 0.1%.

##### Premium Taxes and Assessments

This filing proposes no change to the current approved provision for Premium Tax (1.3%) and Miscellaneous (0.3%).

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### **Underwriting Contingency Provision**

By law, Indiana's rates must be determined such that Indiana's workers compensation insurers can be expected to earn a return that is adequate, fair and not excessive. Analysis and determination of an underwriting contingencies provision is necessary to ensure this premise is maintained.

Current rates contain an underwriting contingency provision of 2.5%. In this filing, NCCI is proposing no change to the currently approved provision.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Assigned Risk Market

As previously mentioned, an overall average decrease of 3.7% to the current assigned risk rate level is being proposed effective January 1, 2015.

A number of programs have been instituted in Indiana. These programs help to assure that the assigned risk market is self-funding. This means that the premium collected in the assigned risk market should pay for losses generated by employers in that market. These programs also encourage employers in the assigned risk market to seek coverage in the voluntary market. They are listed below:

- The Loss Sensitive Rating Program, (LSRP) which is designed to promote safety, loss control, depopulation of the residual market, and premium enhancement. LSRP is a mandatory assigned risk retrospective rating program that, effective 1/1/2012, is applicable to employers with standard premium equal to or exceeding \$250,000.
- An assigned risk surcharge applies to policies with premium greater than \$2,500. Effective January 1, 2011, the surcharge applies only to the portion of premium above \$2,500.
- A Take Out Credit Program designed to encourage insurers and agents to move employers out of the assigned risk market. The Program provides a financial incentive for insurers when they remove employers from the residual market by insuring them in the voluntary market. Credits are applied to an insurer's Plan participation base.
- Removal of premium discounts, which affects larger employers.

The following chart shows the history of assigned risk market shares in Indiana. The assigned risk market shares have increased over the most recent three years.

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Indiana Assigned Risk Market Shares

\* Preliminary, Source: ICRB website

## INDIANA

### WORKERS COMPENSATION FILING – JANUARY 1, 2015

#### Conclusion

This filing document provides a high-level perspective in support of decreasing Indiana's current voluntary loss costs, and voluntary and assigned risk rate levels by an average of 3.8% and 3.7%, respectively.

Here are some of the key observations:

- The financial data experience period evaluated as of December 31, 2013 shows improvement when compared with the experience period evaluated as of December 31, 2012 on which the previous filing was based.
- Indemnity loss ratios exhibit a decreasing trend, in part driven by a continued decline in frequency of lost-time claims.
- Medical loss ratios have generally been increasing, but decreased in the latest two policy years.

#### EXHIBIT II

#### Indiana Written Premium

\* Preliminary, Source: NAIC Annual Statement Data

This exhibit illustrates Indiana's calendar year written premium totals for the latest five years.

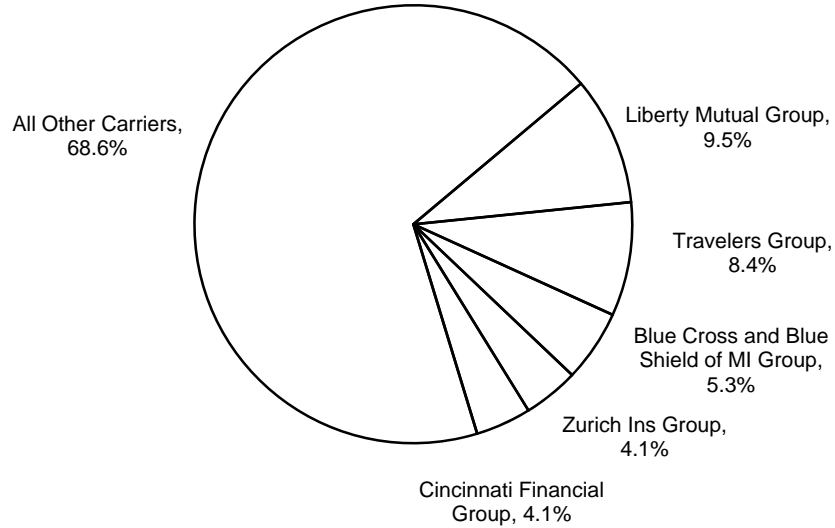

**INDIANA**

**WORKERS COMPENSATION FILING – JANUARY 1, 2015**

**EXHIBIT III**

**Indiana  
Largest Workers Compensation Writers CY 2013**

Source: NAIC Annual Statement Data

The five largest insurance company groups providing workers compensation insurance in Indiana in 2013 are shown in this chart.

**INDIANA**

**WORKERS COMPENSATION FILING – JANUARY 1, 2015**

**EXHIBIT IV**

Advisory Loss Costs and Advisory Rates

**ADVISORY LOSS COSTS AND ADVISORY RATES**

**INDIANA**

Advisory loss costs exclude all expense provisions except loss adjustment expense.

Exhibit IV

Page S1

Effective January 1, 2015

Asb=Asbestos, S=Silica

- F Rate provides for coverage under the United States Longshore and Harbor Workers Compensation Act and its extensions. Rate includes a provision for the USL&HW Assessment.
- M Risks are subject to Admiralty Law or Federal Employers Liability Act (FELA). However, the published rate is for risks that voluntarily purchase standard workers compensation and employers liability coverage. A provision for the USL&HW Assessment is included for those classifications under Program II USL Act.
- N This code is part of a ratable / non-ratable group shown below. The statistical non-ratable code and corresponding rate are applied in addition to the basic classification when determining premium.

Class Code	Non-Ratable Element Code
4766	0766
4771	0771
7405	7445
7431	7453

- P Classification is computed on a per capita basis.
- X Refer to special classification phraseology in these pages which is applicable in this state.

**\* Class Codes with Specific Footnotes**

- 1005 Rate includes a non-ratable disease element of \$0.76. (For coverage written separately for federal benefits only, \$0.74. For coverage written separately for state benefits only,\$0.02.)
- 1016 Rate includes a non-ratable disease element of \$2.27. (For coverage written separately for federal benefits only, \$2.22. For coverage written separately for state benefits only, \$0.05.)
- 6702 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection code rate and elr each x 1.215.
- 6703 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate x 2.095 and elr x 1.935.
- 6704 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate and elr each x 1.35.

Effective January 1, 2015

(Multiply a Non-F classification loss cost by a factor of 1.65 to adjust for differences in benefits and loss-based expenses. This factor is the product of the adjustment for differences in benefits (1.56) and the adjustment for differences in loss-based expenses (1.059).)

**Experience Rating Eligibility**

A risk is eligible for intrastate experience rating when the payrolls or other exposures developed in the last year or last two years of the experience period produced a premium of at least \$5,000. If more than two years, an average annual premium of at least \$2,500 is required. The **Experience Rating Plan Manual** should be referenced for the latest approved eligibility amounts by state.

Effective January 1, 2015

1,162,642 -- 1,198,368	135,850	2,413,495 -- 2,449,239	260,975		
1,198,369 -- 1,234,097	139,425	2,449,240 -- 2,484,984	264,550		

For Expected Losses greater than \$3,414,125, the Ballast Value can be calculated using the following formula (rounded to the nearest 1):

$$\text{Ballast} = (0.10)(\text{Expected Losses}) + 2500(\text{Expected Losses})(7.15) / (\text{Expected Losses} + (700)(7.15))$$

G = 7.15

Asb=Asbestos, S=Silica

- F Rate provides for coverage under the United States Longshore and Harbor Workers Compensation Act and its extensions. Rate includes a provision for the USL&HW Assessment.
- M Risks are subject to Admiralty Law or Federal Employers Liability Act (FELA). However, the published rate is for risks that voluntarily purchase standard workers compensation and employers liability coverage. A provision for the USL&HW Assessment is included for those classifications under Program II USL Act. The listed codes of 6702, 6703, 6704, 7151, 7152, 7153, 8734, 8737, 8738, 8805, 8814, and 8815 under the Federal Employers' Liability Act (FELA) for employees of interstate railroads are not applicable in the residual market.
- N This code is part of a ratable / non-ratable group shown below. The statistical non-ratable code and corresponding rate are applied in addition to the basic classification when determining premium.

Class Code	Non-Ratable Element Code
4766	0766
4771	0771
7405	7445
7431	7453

- P Classification is computed on a per capita basis.
- X Refer to special classification phraseology in these pages which is applicable in this state.

\* Class Codes with Specific Footnotes

- 1005 Rate includes a non-ratable disease element of \$0.76. (For coverage written separately for federal benefits only, \$0.74. For coverage written separately for state benefits only, \$0.02.)
- 1016 Rate includes a non-ratable disease element of \$2.27. (For coverage written separately for federal benefits only, \$2.22. For coverage written separately for state benefits only, \$0.05.)
- 6702 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection code rate and elr each x 1.215.
- 6703 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate x 2.095 and elr x 1.935.
- 6704 Rate and rating values only appropriate for laying or relaying of tracks or maintenance of way - no work on elevated railroads. Otherwise, assign appropriate construction or erection class rate and elr each x 1.35.

Effective January 1, 2015

Terrorism - (Assigned Risk)..... 0.02

United States Longshore and Harbor Workers' Compensation Coverage Percentage  
applicable only in connection with *Basic Manual* Rule 3-A-4..... 65%

(Multiply a Non-F classification rate by a factor of 1.65 to adjust for differences in benefits and loss-based expenses. This factor is the product of the adjustment for differences in benefits (1.56) and the adjustment for differences in loss-based expenses (1.059).)

**Experience Rating Eligibility**

A risk is eligible for intrastate experience rating when the payrolls or other exposures developed in the last year or last two years of the experience period produced a premium of at least \$5,000. If more than two years, an average annual premium of at least \$2,500 is required. The *Experience Rating Plan Manual* should be referenced for the latest approved eligibility amounts by state.

A 25% residual market surcharge is applicable to the premium in excess of \$2,500 of the standard premium, subject to audit.
